# Tripod Mobility helps you on your way

Standard automobiles often aren't very suitable for the physically impaired. To help them function in everyday traffic, most cars require custom-made modifications. This is the field of specialists, this is Tripod Mobility territory.

## Knowledge and experience

Since its establishment in 1980, Tripod has gained international recognition as an innovator in the field of handicapped mobility. With agents on 5 continents, Tripod has developed many tailor-made solutions. The resulting list of type approvals and certificates from international inspection agencies and car manufacturers is impressive.

## Independence

A modified car can liberate the wheelchair user. Sometimes this freedom can be achieved by hand throttle and brake, which can be fitted to basically any car. And sometimes the best solution is a so-called UpFront conversion, in which the front row can be reached by wheelchair. There are various solutions, and Tripod will gladly help you on your way.

### Service and advice

There are numerous conversions to choose from, and shopping for the right solution isn't easy. So at Tripod 's showroom you will receive an independent advice. Tripod also represents other innovative conversion companies, like the Swedish Autoadapt. And if they offer the best solution, Tripod will help you on your way with them too.

### Safety

Customer safety is crucial to Tripod, which is recognized by many car manufacturers. Therefore Tripod is one of the few companies in the world that modifies several chassis while **retaining the full factory warranty**.

Tripod also carries products that were specifically developed for individual safety. Examples are our wheelchair locking systems or the BodyGuard, a retractable back support for passengers that remain seated in their wheelchair.

Because safety is so important for Tripod, we're one of the few conversion companies worldwide that has invested in a test bench. Tripod products are tested according to European safety standards and are RDW (Dutch Department of Transportation) approved.

way since 1980

### Dealer network

To help customers find the personalized service that they often need, Tripod has set up a network of international agents. Our agents are located all around the world, from Australia to Belgium, to the Canary Islands, and they are all trained and certified by Tripod. Our agents are a select group, that can perform a Tripod conversion by Tripod standards. These are the same standards that many car manufacturers demand of us.

For more information on our dealer network, feel free to contact us.
